

GATHR

powering seamless access to events

Let us gather..

The all-in-one AI-powered infrastructure layer for events — from planning and ticketing to networking, vendor sourcing, and virtual hosting.

INVESTOR PITCH DECK

THE PROBLEM

Event Tools Are Fragmented and Falling Behind.

Organizers juggle a patchwork of disconnected tools while attendees get a disjointed, forgettable experience.

Fragmented Tooling

Ticketing, vendor sourcing, and networking live in separate, disconnected systems.

Passive Attendee Experience

Most platforms stop at check-in — attendees rarely connect meaningfully once inside.

No Real Intelligence

Organizers plan blind, without predictive data on demand, pricing, or turnout.

Organizers deserve one intelligent layer for the entire event lifecycle — not a dozen disconnected tools.

Beyond Ticketing.

OS

OPERATING SYSTEM

GATHR is evolving from a simple event ticketing tool into a fully integrated, AI-powered event operating system.

We are replacing fragmented tools with a singular, intelligent layer that manages the entire event lifecycle — from inception to post-event networking.

“

GATHR is the **all-in-one AI-powered infrastructure layer** for events — from planning and ticketing to networking, vendor sourcing, and virtual hosting.

One Platform, Every Layer of the Event.

Ticketing & Access

Frictionless, secure ticket sales and seamless entry management for events of any scale.

Smarter Planning

Help organizers plan events smarter with AI-driven logistical support and scheduling.

Meaningful Networking

Algorithmic matchmaking helping attendees connect with the right people effortlessly.

Automate Sourcing

Automate vendor sourcing with intelligent recommendations tailored to your event type.

Hybrid Experiences

Enable immersive hybrid and virtual experiences, breaking down geographic barriers.

Intelligence & Insights

Provide deep intelligence and actionable insights to maximize future event ROI.

It's Not Just About Showing Up.

Intentional Connections

GATHR learns attendee profiles to suggest high-value networking opportunities before they even arrive.

Digital Integration

Whether in-person or virtual, the GATHR platform ensures a unified, engaging experience.

Real-Time Engagement

Organizers can interact, poll, and guide attendees seamlessly through the mobile interface.

Intelligence Baked Into Every Layer.

Data & Analytics

Predictive analytics for attendance, revenue forecasting, and dynamic pricing models based on real-time demand.

Smart Matchmaking

Neural networking algorithms that connect attendees based on industry, interests, and stated event goals.

Automated Operations

AI agents that negotiate vendor contracts, manage floor plans, and optimize logistical workflows automatically.

Multiple Revenue Streams.

GATHR earns across the full event lifecycle — from ticket sale to post-event insight.

Ticketing Fees

Per-ticket service fee on every event sold through the platform

Organizer Subscriptions

Recurring SaaS plans for AI planning & analytics tools

Vendor Marketplace

Commission on vendor bookings sourced through GATHR

Sponsorship & Ads

Promoted placement for sponsors within event discovery

Hybrid/Virtual Hosting

Fees for streaming and virtual event infrastructure

Data & Insights

Premium analytics and benchmarking reports for organizers

Networking Add-ons

Premium matchmaking & lead-capture tools for exhibitors

White-Label Licensing

Licensing the OS to venues & enterprise event teams

From Every Event, Layered Revenue.

Illustrative unit economics — actual pricing is set per market and refined with pilot data.

Ticketing

Service fee per
ticket sold

+

Organizer SaaS

Recurring subscription
for planning tools

+

Vendor Marketplace

Commission on
sourced vendor deals

+

Data & Sponsorship

Premium insights &
sponsor placements

Layered revenue means GATHR earns from **both organizers and attendees** — ticket fees and subscriptions build predictable revenue, while vendor and sponsor commissions scale with every event's success.

Built to Scale Margin With Every Event.

Directional growth trajectory as GATHR expands from single-city launch to platform-wide adoption. Illustrative, not a forecast.

Lean, Software-First Cost Base

No venues or hardware to own — the core product is software, matching algorithms, and AI infrastructure.

Recurring Revenue Compounds

Organizer subscriptions and repeat ticketing build predictable revenue as the organizer base matures.

AI Drives Margin Expansion

Automated sourcing and matchmaking scale to unlimited events with near-zero marginal cost.

Who GATHR Serves.

A platform built for every stakeholder across the live and hybrid events economy.

Event Organizers

Corporate & Conferences

Concerts & Festivals

Venues & Vendors

Sponsors & Brands

Attendees & Communities

AI-Native, Unified, Built to Scale.

AI-Native

Not bolted on — AI powers matching, pricing, and sourcing throughout.

All-in-One OS

Replaces a dozen disconnected event tools with one platform.

Attendee-First

Networking and engagement built in, not an afterthought.

Scalable

Software-first model built for rapid, multi-market expansion.

Data-Rich

Every event strengthens the platform's predictive intelligence.

A Clear Path From Ticketing to OS.

Phase 1: Core Ticketing

Secure ticketing, access management, and event listing across early-adopter organizers.

Phase 3: Networking & AI

Smart matchmaking, real-time engagement tools, and predictive analytics launch.

Phase 2: Planning Tools

AI-driven planning, scheduling, and vendor sourcing integrated into the core platform.

Phase 4: Full OS Scale

Hybrid/virtual hosting, white-label licensing, and multi-market expansion.

A Staged Path to Scale.

Rather than one lump sum, capital comes in three stages — each unlocked by proof points from the one before.

Illustrative directional benchmarks, not a formal valuation. Instrument (equity / convertible) to be structured with investors at each stage.

How Investors Win Alongside GATHR.

Value accrues through recurring SaaS revenue, marketplace network effects, and multiple exit pathways as the platform scales.

Recurring, High-Margin SaaS

Organizer subscriptions and premium analytics compound as event teams stay on the platform long-term.

Two-Sided Network Effects

More organizers attract more attendees and vendors — and vice versa — deepening the moat over time.

AI-Driven Operating Leverage

Matchmaking and sourcing automation scale to unlimited events at near-zero marginal cost.

Multiple Exit Paths

Strategic acquisition by ticketing, event-tech, or martech platforms, or continued growth financing.

Early investors gain exposure to the live-events economy at the ground floor.
